Huzaifa Dangote

Cyber Security Engineer | Python Developer
Lagos State, Nigeria

Summary

With a strong foundation in cybersecurity and networking, built over 7 years of experience, I seamlessly transitioned into the world of software development. My journey began with Harvard University's "Web Programming with Python and JavaScript" course, where I honed my skills in Python, Django, JavaScript, React, HTML/CSS, Git, Docker, and scaling web applications for performance. This deep dive into development sparked a passion for creating impactful and scalable digital solutions.

Throughout the course, I completed six hands-on projects, including developing an e-commerce auction website, an X-like (formerly known as Twitter) social platform, an email client, and a learning management system. These projects sharpened my ability to design and build full stack applications that solve real-world challenges.

My skill set has since expanded to include proficiency in AWS services such as EC2, RDS, and VPC, empowering me to build secure and robust cloud-based architectures. Combining my expertise in full stack development and application security, I am passionate about delivering innovative, secure, and high-performing solutions for the modern digital landscape.

Driven by a love for technology and problem-solving, I am committed to leveraging my unique blend of software development and security expertise to make meaningful contributions to the tech world.

Experience

Nigerian Maritime Administration and Safety Agency
Cyber Security Engineer
January 2022 - Present (4 years 1 month)
Lagos, Nigeria

Outlined below are some of my achievements in this role:

- # Spearheaded the deployment of a new intrusion detection system, resulting in a 40% reduction in security breaches.
- # Implemented controls to prevent the company's public IP address from being blacklisted.
- # Provided management with strategic recommendations on endpoint security and network monitoring to enhance infrastructure security.
- # Authored and presented detailed cybersecurity reports to executive leadership, facilitating informed decision-making.
- # Collaborated with cross-functional teams to ensure seamless integration of security measures into business processes.

Dangote Industries Limited
 Information Security Analyst
 March 2017 - December 2021 (4 years 10 months)
 Lagos, Nigeria

Outlined below are some of my achievements in this role:

- # Improved incident response times by 30% through the implementation of advanced monitoring tools.
- # Successfully led the remediation of multiple high-severity cybersecurity incidents, minimizing data loss and downtime.
- # Developed and delivered comprehensive cybersecurity training programs for over 100 employees, enhancing overall organizational security awareness.
- # Identified and mitigated critical vulnerabilities in network infrastructure, preventing potential cyberattacks.
- # Played a key role in rollout of a company-wide security policy, aligning with best practices and regulatory requirements.

Dangote Industries Limited
 Information Technology Support Engineer
 March 2014 - August 2014 (6 months)
 Lagos, Nigeria

During this tenure I detected hardware/software issues with emphasis on resolving for performance enhancement.

Some key achievements include:

- I delivered valuable assistance to users regarding use of computer system.

- I collaborated with team that managed the operations for a training facility for 6 months, while ensuring smooth flow of training without network interruptions and computer related issues; Installed essential software for the trainings; the training facility comprised of 150 trainees.

Education

CS50

Web Programming with Python and JavaScript · (November 2023 - December 2024)

Bells University Of Technology

Bachelor of Engineering - BE, Computer Engineering · (2010 - 2015)
